

Features

- Quality and Reliability
- True Zero Start
- Accurate Measurements
- Whisper Quiet
- High Compatibility
- Stress and Pulmonary Function Testing

Whisper Quiet

CardioMed Treadmills are designed and engineered to be exceptionally quiet making them ideal for any environment whether it is an Olympic Training Center or office setting.

Zero Start

CardioMed treadmills have a true zero start and then gently increases the speed in manageable 0.1 mph / .16 km/h increments for patient comfort, safety and confidence.

Importance of Accurate Speed

High torque is essential for accurate speed and testing. CardioMed Treadmills provide uniform digitally controlled high torque entirely over the treadmill's speed range and the patient's weight range, up to a maximum user weight of 500 lbs/228 kgs. The higher torque alleviates the heavy foot fall and slipping of the running belt. Overall the patient has a more enjoyable treadmill experience and the user is confident that the treadmill is performing accurately.

*Optional 15" Touch-Screen
with CardioMed Controller*

CardioMed

TREADMILLS

Features	Specifications
Drive System	4 HP High Torque AC Motor
Running Surface	CMT 22-63 22 x 63 in. (51 x 147cm)
	CMT 26-73 26 x 73 in. (66 x 185cm)
	CMT 30-78 30 x 78 in. (76 x 198cm)
Speed Range	CMT 22-63 .1-15 MPH (.16 - 24 KPH)
	CMT 26-73 .3-22 MPH (.48 - 35 KPH)
	CMT 30-78 .3-22 MPH (.48 - 35 KPH)
Incline Range	0 - 25% (Negative 25% with Optional Display)
User Weight Capacity	500 lbs. (228 KG)
Deck Height	Patient Step Up Height Only 7.5" (19 cm)
Emergency Stop	Center Mounted Emergency Stop
Connectivity	RS232 and USB
Display	Optional 15" Touchscreen Display
Warranty	Domestic: 2 Year Parts, 1 Year Labor International: 3 Year Parts

Safety Assurance

CardioMed understands that your patients' safety and well-being is a major concern. CardioMed treadmills meet or exceed all major safety and regulatory requirements worldwide.

Support

CardioMed Treadmills are supported by a worldwide service organization, including parts and technical engineers to provide quick and satisfactory response times. By providing one of the best warranties and technical service in the Industry CardioMed protects your investment for years to come.

Compatibility

CardioMed Treadmills interface with the majority of Cardiac and Pulmonary Stress Testing Systems. In addition CardioMed treadmills can be controlled by an optional display panel which can be handheld or mounted on the handle bar.

Proud Members of

Power requirements

Domestic

115V, 50/60 Hz, 15 amps SB
NEMA 5-20R non-locking receptacle
Single-phase dedicated circuit

International

100V, 50/60 Hz, 20 amps
200V, 50/60 Hz, 10 amps
230V, 50 Hz, 10 amps
